

Terms & Conditions

Effective date: June 4, 2026

These Terms govern access to Crypto Orbit. By creating an account, purchasing a subscription, or using the service, you agree to these Terms and the Privacy Policy.

1. Educational Purpose and No Financial Advice

Crypto Orbit is an educational and market-intelligence software platform. News summaries, charts, AI responses, strategies, backtests, alerts, and other outputs are informational only and are not personalized financial, investment, tax, or legal advice.

No feature, subscription, AI response, signal, strategy, backtest, alert, or support message should be treated as a guarantee of profit or a recommendation to buy, sell, hold, or trade any instrument.

2. User Responsibility and Market Risk

You are solely responsible for research, trading decisions, position sizing, risk management, taxes, and compliance. Trading and investing can result in partial or total loss. Past performance, simulated results, and backtests do not guarantee future results.

Crypto, forex, stocks, derivatives, and leveraged products can be highly volatile. You may lose part or all of your money, especially when using leverage, margin, illiquid markets, or automated alerts. Use independent judgment and consult qualified professionals where needed.

3. Accounts and Acceptable Use

You must be at least 18 years old to create an account, purchase a subscription, or use paid financial-analysis tools unless use is permitted by applicable law and approved by a parent or legal guardian. Minors should not use paid, trading, strategy, alert, or payment features without legal guardian approval.

- Provide accurate account information and keep credentials secure.
- Do not share, resell, scrape, reverse engineer, overload, or misuse the service.
- Do not upload secrets, brokerage credentials, private keys, unlawful content, or another person's personal data without authority.
- We may restrict or terminate accounts involved in fraud, abuse, chargebacks, attacks, or violations of these Terms.

4. Subscriptions, Billing, and Plan Changes

Paid subscriptions are billed through Razorpay according to the selected monthly or yearly cycle. Applicable discounts, coupons, and referral benefits must be validated server-side and may not be combined unless expressly stated. Upgrades, downgrades, and cancellations take effect according to the checkout confirmation and payment-provider rules.

Subscription purchase provides access to plan features only and does not guarantee profits, market results, or successful trades. Premium access depends on successful payment verification, active account status, and compliance with these Terms. Fraud, misuse, chargeback abuse, or payment manipulation may lead to account restrictions.

5. Refund Policy

Except where required by law, subscription charges are generally non-refundable after access is provided. Duplicate charges, verified technical billing errors, or legally required refunds may be reviewed when reported promptly to

support. Approved refunds are sent to the original payment method and processing time depends on Razorpay and the relevant bank.

6. AI Limitations

AI output may be delayed, incomplete, outdated, biased, or incorrect. The service may display an unavailable state instead of generating an answer when reliable data is missing. Users must independently verify all information before acting.

7. Strategy and Backtest Limitations

Generated strategy code and real-data backtests are tools for research. Results can differ from live execution because of liquidity, spread, slippage, fees, data quality, latency, market gaps, and implementation differences. Subjective strategies may be rejected until deterministic rules are provided.

8. Alerts and Third-Party Services

Alerts and notifications are best-effort and may be delayed, duplicated, or unavailable. Never rely on alerts as the only risk control. TradingView, YouTube, Supabase, Razorpay, market-data providers, Telegram, AI providers, and other third parties operate under their own terms and availability.

9. Service Availability and Changes

We aim for reliable availability but do not guarantee uninterrupted service, real-time data, or permanent feature availability. Maintenance, provider outages, security incidents, legal requirements, or product changes may affect service.

10. Intellectual Property

The platform, branding, software, and original content are protected by applicable intellectual-property law. Users retain rights in their own lawful inputs but grant the limited rights required to process those inputs and provide the service.

11. Limitation of Liability

To the maximum extent permitted by law, Crypto Orbit is not liable for trading losses, lost opportunities, data-provider errors, indirect losses, or decisions made using service output. Nothing in these Terms excludes liability that cannot lawfully be excluded.

12. Governing Law and Contact

These Terms are governed by applicable laws of India. Before formal proceedings, users should contact pichkutradezone@gmail.com and allow a reasonable opportunity to resolve the issue.

Questions, grievance requests, or data deletion requests can be sent to pichkutradezone@gmail.com.
